

In TSU, at home and in school this week, we have been recapping the seven continents and the five oceans of the world. We have been locating them on different maps and have been researching different facts about them. We have found out that Asia is the largest continent in the world and that Antarctica is home to the emperor penguin!

WALT: (Begin to) Locate the world's countries, using maps to focus on Europe (including the location of Russia) and North and South America, concentrating on their countries and major cities.
