

Dear Mounp College,

We are here to tell you about our festival halloween.
Where halloween came from

Halloween first originated from a harvest festival made by the Celts in the UK and since this festival marked the start of winter and the end of summer the Celts made a huge decision in their life to believe that god would save their crops if the Celts made a huge fire and sacrificed animals. Where the name originated from.

On 1st of November it became Saint day when the Celts became christian. The night before was named Alls Hallows Eve and later became Halloween.

Why people dress up on Halloween.

people dressed up because they believed that ghost went around the streets this meant that they had to trick or treat so they decided to trick them. They started wearing masks to trick the ghosts but soon they decided to wear gull costumes with masks.

Why we carve pumpkins.

A long time ago, there was a boy named Jack. He played nasty tricks on his family and other citizens. So when it came his time to go to heaven or hell they didn't send him to any.

They sent him with a turnip in his hand to roam the streets. The turnip's name turned into Jackalabn. They soon realised pumpkins were bright and were easier to carve so they soon changed it into pumpkins. Why we go trick or treating.

The Celts believed that ghosts would go inside their houses. This made them scared so they began to leave out bowls of food to stop them coming. As time went on, they started not to be that scared and went around eating people's food. Soon people started giving money, food and treats away.

Our favourite thing about halloween is knocking on doors with my family and friend asking trick or treat.
