

Dear students of Luchwood Primary,

It was really interesting to read your reply. I have a family of four, even though we are a pretty small family it's really fun living together. My father loves cricket and is a badminton player, he has been playing since 2015, and my mother can make anything from a tiny bar of soap to shampoos, scrubs, lotions and various beauty products. My brother is in grade 10 and his passion is to become a software engineer. My father deals with Iron rods.

I've been playing basketball for 3 years now and is the 3 most popular sport following cricket & football. I have been hunting for my dream job since in 2017, my uncle told me about the various planets in the humungous solar system. I interest in planets as they bring a mystery vibe inside of me and I really want to unfold the secrets among them.

Thank you,
Shawrya
